

ARMOUR

Armour is a hard red winter wheat variety developed by WestBred and licensed to AGSECO in 2008.

Armour is broadly adapted to the central Great Plains and features early maturity and excellent yield potential. This variety offers exceptional straw strength, very good leaf rust resistance, and excellent tolerance to low pH soil conditions. Armour is an “Impact” variety and should grow in popularity to dominate acres planted in eastern Colorado, all of Kansas, all of Nebraska and the northern 1/2 of Oklahoma.

Characteristics

Plant Height	Medium
Maturity	Early
Coleoptile Length	Medium
Seed Size	Large
Straw Strength	Excellent
Test Weight	Good
Winterhardiness	Very Good
Milling & Baking	Acceptable
Yield Potential	Excellent
Grazing Potential	Good

Disease & Insects

Barley Yellow Dwarf	N/A
Hessian Fly	Susceptible
Powdery Mildew	Resistant
Leaf Rust	Resistant
Septoria Leaf Blotch	Mod. Susceptible
Spindle Streak Mosaic	Resistant
Soil Borne Mosaic	Resistant
Stripe Rust	Resistant
Tan Spot	Mod. Resistant
Wheat Streak Mosaic	Mod. Susceptible

Pedigree: WestBred Exp. Line, KS94U326

PVPA Status: Protected, must be sold only as a class of certified seed.

Superior yields . . . season after season.
