

AUSTRIAN WINTER PEAS

COOL SEASON PEA

Austrian Winter Peas are a cool-season annual pea/ legume crop that is primarily used for cover crops, winter grazing, and wildlife food plots. **Austrian winter peas** are a low-growing, vine-like legume that is an excellent nitrogen fixing product. The foliage of the plant is pale green in color, with flowers that are usually purple, pink, or reddish. **Austrian Winter Peas** are very winter-hardy, but can winter kill if they are exposed to extremely cold temperatures for too long.

PLANTING TIPS

- ◆ Plant the seed 1 1/2 to 2 inches deep in a well prepared seedbed
- ◆ For optimal results, it is important to inoculate the seed
- ◆ Plant in well-drained soil area
- ◆ If no-till planting, kill the existing vegetation a couple weeks prior to planting and create a clean field prior to drilling
